

## BUILDER ADVANTAGES

Change in the building industry does not happen quickly or easily, until there is a clear advantage and motivation to do so. Now there is a system that gives you real reason to make that change: **Thermagreen Steel Structure System.**

Thermagreen panels are stronger, more energy efficient, quicker to assemble, and will give you project savings now and for years to come. Our system is far more sustainable and environmentally friendly than traditional building methods.

- Decreases construction time by an average of 30%
- Reduces framing time by at least 50%
- Labor cost is reduced as panels are lightweight and panels can be handled by one person
- Quick and simple component connection
- Almost totally eliminates project waste and clean up
- Decreases HVAC requirements
- Materials are 100% recyclable
- Door & window openings are pre-framed
- Meets & exceeds building codes (ICBO, BOCA, SBCCI, HUD, SOUTH FLORIDA)
- Lateral & vertical load-bearing capabilities are exceptional
- Panels can be clad with standard finishes
- Walls are straight
- Can be used for wall, floor, or roof systems
- Rapid installation learning curve
